- Backend Development & APIs:** Python, Django, Flask, RESTful APIs, JSON, API Integration
- Databases:** MySQL, SQL, Database Design, Query Optimization
- Developer Tools & Version Control:** Git, GitHub, VS Code
- Software Engineering Concepts:** Data Structures, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Software Design Principles, Debugging, Clean Code Practices

PROJECTS

- AI-Powered Recruitment System** (Full-Stack Web Application) Jan 2025 – May 2025
Python, MySQL, React.js, JavaScript, HTML, CSS, Gemini LLM
 - Designed and developed a **full-stack recruitment system** to automate candidate screening and evaluation workflows, improving efficiency and accuracy.
 - Developed and maintained **backend services using Python and MySQL**, enabling secure data storage and reliable RESTful API operations.
 - Integrated **Gemini LLM** to perform intelligent resume analysis, candidate ranking, and automated feedback generation.
 - Implemented **resume parsing and data processing modules** to extract, validate, and normalize structured candidate information.
 - Built a **responsive React-based frontend** and integrated UI components with backend services via REST APIs.
 - Performed **unit-level testing, debugging, and performance optimization** to enhance application reliability and maintainability.
 - Collaborated with peers to enhance features within an **existing software architecture** while following **SDLC and clean code best practices**.

CERTIFICATIONS

- NPTEL – The Joy of Computing Using Python (IIT)** Jul–Oct 2024
- Google AI & Machine Learning Workshop** Oct - Dec 2024
